In the Dziruli valley of the river (In the territory of Sachkhere municipality) There are tourist facilities, Which form the basis for the adventure, Development of cultural-cognitive and extreme tourism is quite intensive. Student project "Geographical Survey of Touristic Objects of Sachkhere Municipality" There was a search of the tourist attractions in the valley and a complex survey was conducted.

The following aspects of the research were analyzed: interest towards natural and cultural heritage monuments: What income can be earned by residents of the municipality living around nature monuments. Recognition of natural and cultural heritage monuments in local population: Attitude and action. River Dzirula Gorge has a great tourist potential Various and beautiful natural conditions that are not fully utilized. Important objects in villages that do not even have a status of nature, But if they were traveling on tourist routes It will significantly enhance the potential for tourism of this pond and make it attractive for local or foreign visitors.

River The biggest problem of Dziruli villages is migration processes And the decline of the villages, Therefore, it is necessary to develop villages in the direction of tourism, Because there is a source of additional income for the rural population. For this they have a significant resource, There are many ancient settlements, Which were destroyed by geodynamic processes, As well as many centuries-old temples and beautiful panoramic views. The development of scientific tourism is also possible in the river Dzirula valley.
